

EARTH & SPACE SCIENCE

SUPPLEMENTAL CURRICULUM

Science Activities
in
English and Spanish

Produced by
The New Mexico Museum of Natural History & Science
as part of its
"Proyecto Futuro" Initiative

1997

Table of Contents

Acknowledgements	i
Water	1-59
Water Introduction	1
How Much Water is There?.....	7
Groundwater	13
Porosity and Permeability.....	17
Cleaning Up the Water	27
Water Cycle in a Bag.....	35
Disappearing Puddles	37
Rio Grande Water Cycle	41
Meteorology.....	61-116
Meteorology Introduction.....	61
Making a Cloud.....	65
How to Read a Thermometer.....	73
Making a Barometer.....	85
Making a Wind Vane	93
Relative Humidity	99
Finding Air Speed: Making an Anemometer.....	107
Rocks and Minerals	117-136
Rocks and Minerals Introduction.....	117
Chocolate Chip Cookie Geology	121
Rock Salt.....	123
Shake and Settle	125
Erosion by Water	131
Rock Cycle Web	135
Time and Fossils.....	137-176
Time and Fossils Introduction	137
How Much is a Million?.....	139
Geologic Time Line	141
Tracks in Time	151
Making Fossils	155
Amber Fossils	161
Microfossils	163
Digging up Dinosaurs.....	169

Plate Tectonics	177-227
Plate Tectonics Introduction	177
Be the Earth	181
Earth Building	185
Primary Plate Puzzle	189
Plate Puzzle	197
New Mexico Volcanoes	207
Earthquake Mapping	221
Astronomy	229-268
Astronomy Introduction	229
Daytime Astronomy	233
Moon Phases	235
Scale Model of the Solar System	241
Classroom Planetarium	243
Star Charts	257
Using an Astrolabe	261
Maps and Models	269-301
Maps and Models Introduction	269
Primary Mapping	271
Middle Grades Mapping	273
Globe Toss	281
Play-Doh Topo	285
Stream Model	291

Standards Alignment

ACKNOWLEDGEMENTS

This curriculum supplement represents a collaborative effort by educators and administrators from the New Mexico Museum of Natural History & Science to provide teachers of English and Spanish-speaking students in grades K-8 with hands-on, auxiliary earth and space science activities. This guide is part of the Museum's *Proyecto Futuro* (Project Future) initiative, a multi-year collaboration between the New Mexico Museum of Natural History & Science and participating principals, teachers, parents, and students from the Albuquerque Public Schools. The Museum has implemented *Proyecto Futuro* with the purpose of improving science and mathematics teaching and learning for elementary and middle school grades—by incorporating teacher professional development, bilingual curriculum materials, and family science and math workshops. The *Proyecto Futuro* staff is grateful to Chris Peknik for creating the original illustrations on the following pages: 65, 68, 70, 85, 157-160, 273-279, 287-289, 291, 294 and 298.

This material is based upon work supported by the National Science Foundation under Grant No. 9802286. Any opinions, findings and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation (NSF).
